

**DENTAL COMPOSITION BASED ON SILICONE CROSSLINKABLE BY
CATION PROCESS**

5

Abstract of the Disclosure

The invention concerns dental compositions. Said composition comprises (1) a silicone crosslinkable
10 and/or polymerizable by cationic process; (2) an efficient amount of at least an initiator such as an organometallic complex borate; and (3) a dental filler present in the composition in a proportion of at least 10 wt. % relative to the composition total weight.
15 Said dental compositions are useful for making dental prostheses or for dental restoration.
